The sequence (DNA 154095-2998) encodes a PRO polypeptide (PRO20026) which is the human Interleukin 17 receptor, IL-17RH4. A composition containing ant Agonists to the PRO polypeptides or individual components are useful for treating a mammal with an immune related disease, e.g. systemic lupus erythematosus, rheumatoid arthritis, osteoarthritis, juvenile chronic arthritis, a spondyloarthropathy, systemic sclerosis, an idiopathic inflammatory myopathy, Sjogran's syndrome, systemic vasculitis, saccoidosis, autoimmune haemolytic anaemia, autoimmune thrombocytopaenia, thyroiditis, diabetes mellitus, immune-mediated renal disease, a contact dermatitis, an allergic disease e.g. food hypersensitivity, asthma, a transplantation associated disease, or a chronic inflammatory
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              diseases
                                                                                                                                                                                                                          disease
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Grimaldi CJ;
Vandlen RL;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 demyelinating polymeuropathy. Treating a degenerative cartilaginous disorder comprises administering a PRO1031 or PRO1122 polypeptide agonist, or antagonist to the mammal. Numerous examples of the disea and disorders are given in the specification
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Novel PRO polypeptides homologous to interleukin-17, useful for the diagnosis and treatment of immune related disease e.g. rheumatoid arthritis and diabetes.

New isolated nucleic acid encoding a PRO polypeptide, e.g. PRO1031, PRO1122, PRO10272, useful in molecular biology, chromosome and gene mapping, in generating antisense RNA and DNA, and in gene therapy.

Claim 2; Fig 17; 148pp; English.

The invention relates to an isolated nucleic acid comprising at least 80% sequence identity to 8 cDNA sequences encoding PRO polypeptides (or their extracellular domains) which are members of the interleukin-17 (IL-17) family of cytokines. Also included are expression vectors, host cells, the polypeptides (tased to a heterologous amino acid sequence, an anti-PRO cantibody, a composition comprising the above polypeptide (or its agonist or antagonist, or the antibody cited above) in combination with a carrier, determining the presence of a PRO polypeptide in a sample.

CC carrier, determining the presence of a PRO polypeptide in a sample.

CC carrier, determining the presence of a PRO polypeptide in a sample.

CC carrier, determining the presence of a RRO polypeptide in a sample.

CC dentifying a compound that mimics or inhibits the activity of the PRO polypeptides cited above, or a compound that inhibits the expression of a colypeptides cited above polypeptides, stimulating or inhibiting the control of T-lymphocytes, enhancing or decreasing the infilation of T-lymphocytes, enhancing or decreasing the infilation of infilammatory cells into a tissue of a mammal and inhibiting or stimulating angiogenesis induced by a PROLO31 polypeptide or its agonist in a mammal. The nucleic acid is useful in molecular biology, e.g. use as hybridisation probes, in chromosome and gene mapping, in generating the transgenic animals or knock-out animals which, in turn, generating either transgenic animals or knock-out animals which, in turn, casecul in the development and screening of therapeutically useful reagents. The PRO polypeptide or the antibody is used in preparing a condition responsive to the polypeptide or medicament for treating a condition responsive to the polypeptide or medicament for treating a condition responsive to the polypeptide or antibody, and in various diagnostic assays. For immune-related disorders,

New interleukin 17 related mammalian cytokine polypeptide (IL-17E) polypeptide, useful for preparing composition for treating immune-related or inflammatory diseases, e.g. psoriasis, asthma, allergic rhinitis or
                                                                                                                                                                                                                                                        The invention relates to a new isolated interleukin 17 related mammalian cytokine polypeptide (IL-17E). The polypeptide is useful for preparing a composition for treating immune-related or inflammatory diseases, e.g. psoriasis, asthma, allergic rhinitis or rheumacoid arthritis. The present sequence represents cDNA encoding a human interleukin 17 related

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        The invention describes an isolated polypeptide (I) having at least 80% amino acid sequence identity to interleukin(IL)-17 and IL-17 receptor protein. The novel PRO polypeptides are useful for treating an immune related disorder such as systemic lupus erythematosus, rheumatoid arthritis, osteocarthritis, juvenile chronic arthritis, steumatoid arthritis, spordersuby, systemic vacculitis, sarcoidosis, appondyloarthropathy, systemic sclerosis, idiopathic inflammatory autoimmune haemolytic anaemia, autoimmune thrombocytopenia, thyroiditis, autoimmune haemolytic anaemia, autoimmune thrombocytopenia, thyroiditis, autoimmune haemolytic anaemia, autoimmune thrombocytopenia, thyroiditis, colymeuropathy, Guillain-Barre syndrome, chronic inflammatory of polymeuropathy, metalopiliary disease, infectious or autoimmune chronic active hepatitis, primary bilary dirknois, contoimmune chronic active hepatitis, primary bilary dirknois, autoimmune chronic active hepatitis, primary bilary dirknois, contomic dermatitis, sclerosing cholangitis, inflammatory bowel disease, gluten-sensitive enteropathy, Mhipple's disease, autoimmune contomic dermatitis, primary bilary disease, autoimmune contomic dermatitis, postiasis, allergic disease, erythema multiforme, contact dermatitis, postiasis, allergic disease, arbina, allergic disease, autoimmune contomic disease or graft rejection or graft. versus-host-disease, in a samole suspected of containing the presence of containing the presence of containing the presence of containing the propreptide and mammal. An anti-(I)-antibody is useful for decermining the presence of containing a compound that inhibits the activity of PRO polypeptide or demonally entression of gene encoding PRO polypeptide, by contacting cells which normally express the polypeptide with a candidate compound, and
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Novel polypeptides having sequence similarity to interleukin-17 and interleukin-17 receptor protein useful for treating, diagnosing immune related disorders and treating degenerative cartilaginous disorder in a
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  PJ, Grimaldi JC;

The present invention relates to the isolation of novel human PRO
C polypeptides, and the polynucleotide sequences encoding them. The novel
ERO polypeptides are human interleukin 17 (hiL-17) homologues. The PRO
polypeptide and polynucleotide sequences are useful for diagnosing and
c treating disorders associated with the aberrant expression or activity of
treating disorders associated with the aberrant expression or activity of
c treating disorders include degenerative cartilaginous
c disorders and immune related diseases, such as systemic lupus
c erythematosis (SiE), rheumatoid arthritis, osteoarthritis, juvenile
c chronic arthritis, spondyloarthropathy, systemic sclerosis, an idiopathic
cinflammatory myopathy, 5jogren's syndrome, systemic vasculitis,
sarcoidosis, autoimmune hemolytic anaemia, autoimmune thrombocytopaenia,
c thyroiditis, diabetes mellitus, immune-mediated renal disease, a
demyelinating disease of the central or peripheral nervous system,
cidiopathic demyelinating polyneuropathy, disilain-Barre syndrome, a
chronic inflammatory demyelinating polyneuropathy, and hepatobiliary
disparations or antoimmune or antoimmune active honerities or reference
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           disease, infectious or autoimmune chronic active hepatitis, primary biliary cirrhosis, granulomatous hepatitis, sclerosing cholangitis, bilary cirrhosis, granulomatous hepatitis, sclerosing cholangitis, binflammatory bowel disease, gluten-sensitive enteropathy, Whipple's disease, an autoimmune or immune-mediated skin disease, a bullous skin disease, erythema multiforme, contact dermatitis, psoriasis, an allergic disease, asthma, allergic rhinitis, atopic dermatitis, food hypersensitivity, urticaria, an immunologic disease of the lung, ensemblantation-associated disease, graft rejection or graft-versus-host-disease. The present sequence encodes a human PRO
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           New isolated IL-17 nucleic acids and polypeptides, useful for diagnosing and treating disorders with aberrant expression or activity of the IL-17 polypeptide, such as degenerative cartilaginous and immune-related disorders.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 2319 BP; 585 A; 633 C; 602 G; 499 T; 0 U; 0 Other;

2; Fig 17; 154pp; English

The present invention relates to the isolation of novel human PRO polypeptides show sequence similarity to interleukin-17 (IL-17) and to polypeptides show sequence similarity to interleukin-17 (IL-17) and to the IL-17 receptor. The PRO polypeptides, agonists, antagonists and antibodies that specifically bind to the PRO polypeptides are useful for treating an immune related disorder in a mammal, such as systemic lupus trathmatosus (SIE), rheumatoid arthritis, osteoarthritis, juvanile chronic arthritis, spondylarthropathy, systemic sclerosis, idiopathic inflammatory myopathy, Sjogren's syndrome, systemic vasculitis, sarcoidosis, autoimmune haemolytic anaemia, diabetes mellitus, immune—mediated arenal disease, demyelinating disease of the central or peripheral nervous system, Guillain-Barre syndrome, hepatobiliary or graft-versus-host disease. A composition comprising a PRO polypeptide, agonist, antagonist or antibody is useful for the treatment of an immune the proliferation of Inlammatory cells into a tissue. The present sequence encodes a human PRO polypeptide of the invention.

Sequence 3, Application US/08978773

Patent No. 6083906

PATENT NORMATION:
APPLICANT: Troutt, Anthony
TITLE OF INVENTION: Method of Regulating Nitric Oxide Production
NUMBER OF SEQUENCES:
CORRESPONDENCE ADDRESS:
ADDRESSEE: Immunex Corporation
STREET: 51 University Street
CTTY: Seattle
STATE: WA

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ઠે
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ద
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ŝ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              1624 eccaccitoccicio actrico e con contra con contra contra contra con contra con contra con contra con contra contra contra con contra contra
